Eagan, MN 55122 | 651-235-6120 | bradyep@gmail.com | <https://bradyep.com>

PROFESSIONAL SUMMARY

Senior Software Engineer with 15+ years of experience building scalable, enterprise-grade applications for Fortune 500 companies. Full-stack expertise in .NET, React, Angular, TypeScript, database, mobile and cloud platforms. Returning to full-time employment after managing family medical care and developing multiple open-source projects including a custom CMS, news aggregation platform, and Beat Saber community tools. Proven track record of leading complex initiatives, architecting systems, and delivering high-impact solutions.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, HTML5, CSS3, Swift, PowerShell

Frameworks & Libraries: .NET Core/6/10, ASP.NET MVC, React, Node.js, Angular, Cordova, Electron, Express, Entity Framework

Databases: SQL Server, SQLite, Elasticsearch, Redis, Oracle

Tools & Platforms: Docker, Git, Azure, AWS, Visual Studio Code, Visual Studio, npm, webpack

Development: Full-stack development, system architecture, database design, RESTful APIs, agile methodologies

PROFESSIONAL EXPERIENCE

Independent Software Developer | Eagan, MN

August 2022 – Present

- Developed DSCMS (Dead Simple Content Management System), a full-featured CMS with multi-content type support, custom templates, and user authentication built on ASP.NET Core and SQLite, deployable via Docker
- Built newsfeeds.fyi, a customizable news aggregation platform with TypeScript/React frontend and Node.js/Express backend allowing users to curate personalized RSS feeds
- Created check-map-plays, a Node.js application tracking play statistics for Beat Saber community maps with automated data collection and analysis
- Contributed to open-source BeatLeader project, implementing server-side features for game mode replay functionality

Senior Software Engineer | Mackin Educational Resources, Burnsville, MN

May 2018 – May 2022

- Lead developer for Mackin VIA, a cross-platform e-reader that combined native code with Cordova and Electron, delivering to iOS, Android, Chromebook, Windows, macOS, and web. Delivered e-book and audiobook features including offline support, DRM, TTS, accessibility enhancements, highlighting, bookmarking, and UI animations.
- Built and launched Mackin Search (mackin.com), an e-commerce platform enabling schools to discover and purchase educational resources. Built with React and Node.js, serving thousands of educational institutions.
- Lead Reading Metrics initiative to track granular student engagement data across all Mackin resources, providing valuable insights to educators and improving product offerings
- Developed content conversion pipeline, processing publisher materials (PDF, EPUB, audio) into standardized Mackin formats with automated QA tools, significantly reducing manual review time
- Executed large-scale image optimization project compressing existing and new assets, reducing server bandwidth costs by 40% while maintaining visual quality

Senior Software Engineer | L3Harris Technologies (formerly Aerosim), Burnsville, MN

May 2013 – May 2018

- Architected and built LCMS (Learning Content Management System), one of the world's largest pilot training platforms used by Southwest Airlines, Delta, Air France, KLM, and American Airlines. Designed as interconnected single-page applications handling report generation, content management, bulk user operations, and secure exam delivery.
- Single-handedly fulfilled roles of database administrator, front-end developer, and back-end developer. Wrote 25,000+ lines of modular JavaScript alongside comprehensive C# business logic and SQL stored procedures.
- Led migration of all North American and European customers to Azure cloud infrastructure, designing new server architecture, coordinating deployment schedules, and achieving 100% launch success rate across all customers
- Introduced modern development practices including MVC architecture, RESTful APIs, and single-page application patterns, significantly improving code maintainability and development velocity
- Mentored junior developers, conducted code reviews, and established deployment processes that eliminated production issues

Earlier Career: Software Engineer & Web Developer

2002 – 2013 | Staywell Health Management, National Business Systems, Orbit Systems, Martin|Williams

- Developed enterprise health management systems, document retrieval platforms, and client web applications using C#, JavaScript, SQL Server, and Oracle
- Delivered email marketing campaigns reaching 500,000+ subscribers for Fortune 500 companies including Scotts and UnitedHealthcare
- Consistently promoted for technical leadership, architectural contributions, and mentoring of development teams

EDUCATION

Bachelor of Arts, Computer Science & Economics

University of St. Thomas, St. Paul, MN | Graduated 2002
